however, we will pursue and attempt to get into the database

i don't get it: why do us citizens in the wealthiest country in the world, put up with this? obviously it means the most vulnerable will have poorer health  shorter lives ...

during an interview with martin bashir (buh-sheer), he says, "when you say 'bed'; you're thinking sexual; it's not sexual, we're going to sleep"

we found that several mutations in epitopes that are commonly associated with potential adverse health conditions, including lung diseases - is generally not restored
